Key Capabilities of Take Any Test Platform

- AI-based online proctoring for cheat-proof exams.
- Result Diagnostics, In-depth, Multivariate Analysis, Algorithm based.
- Repository Based Randomisation of test Questions.
- Actionable insights for students and teachers separately.
- Instant result analysis in excel and pdf formats.

Calibrated Randomisation

While creating randomised question sets manually for up to 4 sets of question papers has been done before, what if we tell you that our system lets you achieve the following -

1. All 40 students receive unique question paper
2. All 40 question papers conforms to the same calibrated criteria.

NQL- Next Question Logic

- A proprietary algorithm makes our Online tests throw a question to users based on the purpose of the examinee, from a Learner mode to a Testing mode.
- The sequence & selection of the question makes our platform highly effective for the holistic development of student/test-takers.

AI Proctored Exams

1. Our AI engine verifies the user's face & detects movements or sounds during the exam window.
2. Also detects instances like No face, multiple faces
3. Also detects if multiple tabs are opened during the exam.
4. It is programmed to throw alerts to the examinee & the proctor for potential proctoring violations.

Result Analytics

Proctor Results:

1. Post exam, the proctor results can be downloaded in pdf format.
2. Proctor also records the visuals /snapshots of the candidate while appearing for exam

Result Insights:

1. In-depth and multivariate analysis of the examinee's performance is captured in the performance analytics
2. Section wise performance in graphical format
