

Deviceless GPS Integration

Track. Verify. Manage

Leverage the power of your existing smartphone to enable real-time location tracking and attendance. No hardware. No installations. Just seamless, intelligent GPS integration built for modern institutions.

Device-Free Operation

No biometric machines, RFID cards, or external hardware needed

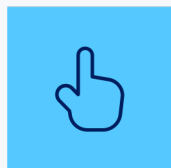

Real-Time Location Tracking

Accurate GPS-based monitoring with instant updates

Smart Attendance Automation

Automatically mark attendance based on location presence

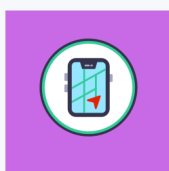

Live Monitoring with Web Sockets

Enables real-time data updates through web-based socket technology for instant visibility.

Secure & Reliable

Independent GPS system ensures better control and data handling

Seamless Integration

Works within your existing app ecosystem
